

HealSafe Clothes Hanger System

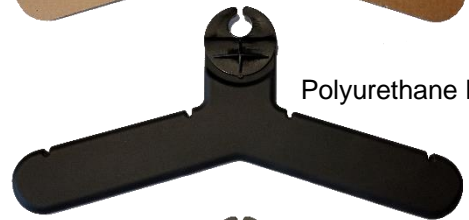

Behavioral health facilities can make their facilities more home-like and increase patient autonomy by offering the ability to store clothes on hangers. HealSafe's Clothes Hanger System includes custom clothes hangers that are made of materials that cannot be weaponized. The hangers snap onto the same rail used in the HealSafe Ceiling Curtain Rail System and release from the rail when sufficient weight is applied. Sold in kits with a length of rail, pair of end caps, and 5 hangers. Hangers also sold individually.

Specifications

- **Rail and End Caps:**
 - Extruded aluminum, white powder coated – See Curtain Rail for details
- **Clothes Hangers:**
 - Choice of 3 Types: Cardboard, Polyurethane Foam, or Polyurethane
 - Release Force:
 - 1 Hanger will release with under 10 lbs
 - 5 Hangers will release with approximately 25 lbs
- **Installation:**
 - Rail mounts on ceiling or under a shelf
 - Pre-drilled mounting holes on rails, plus 2 holes per end-cap
 - Requires #10 flat-head security fasteners (not included)
