

Installation and Care of SP-11-GDK Grid Drain Kit

Warning: This product is ligature-resistant only when properly installed. A loosened fixture can easily be tied to. Any product which can be removed can be used as a weapon!

Installation:

1. Identify the items shown in the picture below:

2. Install the grid drain in the sink using the included washers and lock nut
3. Cut tubular components as needed to fit the assembly in under the sink. **(The air vent should be as the high as possible under the countertop).**
4. Connect components as arranged in the picture
5. Connect the bottom of the tee to P-trap (not included)
6. Ensure that all under-sink components are kept within a secure enclosure

Care and Maintenance:

- Clean grid drain with soft rag and mild detergent. Do not use caustic or abrasive cleaners.
