

SP-11-GDK-K Kitchen Sink Grid Drain Kit

Standard grid drains can be used as a point of ligature attachment by threading a string or lace through the holes of the grid. The SP-11-GDK-K greatly reduces this hazard by utilizing holes less than half the diameter of the typical grid drain. Effective drainage is achieved with the included air vent.

Specifications

- **Grid Drain:**
 - LKVR18B Drain Body (304 SS) for 3-1/2" openings
 - 303 Stainless Steel Grid Strainer w/ 3/32" Dia Holes
 - Grid Strainer secured w/ vandal resistant screw
- **Other Components:**
 - 1-1/2" x 4" SS flanged tailpiece w/ nylon washer and nut
 - 1-1/2" chrome plated cast brass slip joint tee
 - 1-1/2" x 12" chrome plated brass waste bend, 22 ga
 - 1-1/2" x 8" chrome plated brass flanged tail piece, 22 ga
 - Air vent with float ball check
- **Operation:** Drainage flow rate exceeds 2.3 gpm
- **Installation:** Grid drain fits in standard 3-1/2" sink openings. The tee has 1-1/2" slip joint connection to P-trap (not included). Requires cutting of tubular brass components to fit the air vent under the sink.
