

SP-3V Vertical Grab Bar

Patent No. 8,646,151 B2

The SP-3V Vertical Grab Bar is the only ligature-resistant grab bar that is specifically designed for installation in a vertical orientation. It allows grasping with either the right or left hands, and it permits approaches both parallel and perpendicular to the wall. The flanges are sloped on top and bottom for ligature resistance and drainage. The SP-3V Vertical Grab Bar is stocked in 18" nominal (graspable) length. Custom lengths are available.

Specifications
