

SP-6 & SP-6A Clothes/Towel Hook

The SP-6 and SP-6A Clothes/Towel Hook rotate downward when the applied force exceeds the release force, causing any attached ligature to slide off. Push up on the hook to return it to the original position.

The original SP-6 has a release force of approximately 35 lbs, as measured from the base. The new SP-6A is available for those who desire a lower release force.

Specifications

- **Dimensions:** 4-1/4" square flange, 1-3/8" hook projection, 3/8" hook diameter
- **Operation:**
 - *SP-6:* Hook rotates when 35 lbs (approximate) is applied at base
